

HSE Policy

Actron is a leader in designing, developing, and manufacturing of electronic components of vehicles. While we strive to achieve excellent customer satisfaction and profits through R&D, production, and other services, we also dedicate to maintain a safe work environment. The HSE Committee is established to manage and improve our Health, Safety, and Environment policy. We do so by adopting Environmental Management System *ISO 14001* and Occupational Health and Safety Management System *OHSAS 18001*, and by recognizing the health and safety of employees as a key company asset.

Our commitment to HSE is managed and reinforced through all levels of corporation with the demonstration of *competency, action, preservation, and responsibility*. The following principles are created for building a better life for our employees as well as fulfilling our corporate social responsibility.

- Comply with HSE-related laws and customer compliances
- Continue green product design, pollution prevention, greenhouse gas reductions
- Continuously improve to target zero pollution and zero safety incident
- Promote employee health and provide a safe and clean workplace
- Create an organizational culture of HSE excellence
- Identify HSE-related issues for sustainable development
